Dennis- Initially, I don't see a problem, but I would like to run it by Contracts...will get back to you...

Thank you,

Karen Esposito

Karen hi.

Not sure how to respond to this. I'm not familiar with this request. It appears that we are maybe promoting them for work. Let me know. Thx Dennis

Hello all.

TechLaw would like to post the message below on LinkedIn.

I am respectfully requesting that you review the statements below and inform me if you have any issues with TechLaw posting this information. TechLaw is proud to have EPA as a client and looks forward to providing EPA continual emergency response and technical support for years to come.

Thank you.

Subject: LinkedIn entry

Here is the LinkedIn entry, as proposed:

CHARLESTON, WV (Jan. 24) – Members of TechLaw, Inc.'s, emergency response team remain on the scene in Charleston to support the US Environmental Protection Agency's response to the chemical spill into the Elk River earlier this month. TechLaw's trained responders have been assisting EPA at and near the scene daily for two weeks, shortly after the spill was reported at the Freedom Industries plant. At the direction of EPA, TechLaw was dispatched to conduct air monitoring to ensure safe breathing zones for workers on scene, as well as for residents of the area who were affected by the spill. TechLaw staff remain on the scene to assist EPA in water sampling, air monitoring, and documentation of Freedom Industries' activities at the site. The West Virginia Department of Environmental Protection leads the unified response to the spill, with support from EPA and the US Coast Guard.

TechLaw's response is part of its multiyear contract under EPA's Superfund Technical Assessment and Response Team (START) program in EPA Region 3-West. TechLaw has been the lead START Region 3-West contractor for EPA since 2005. The TechLaw team is based in Wheeling, WV.
